

COPPER KETTLE WITH PLANTER

Quality Features

- Unique, patented integral planters
- Lightweight, portable, self-contained design
- Easy to assemble; ready to use in minutes
- Durable, watertight rotational molded polyethylene construction
- Hand-finished, realistic colors and accent designs
- Energy efficient, oil-free, UL and CSA listed fountain pump

This copper-finish kettle fountain planter adds charm with a playful decorative sun motif. Featuring long-life construction with color-fast finish, it makes a delightful centerpiece for gardens or verandas.

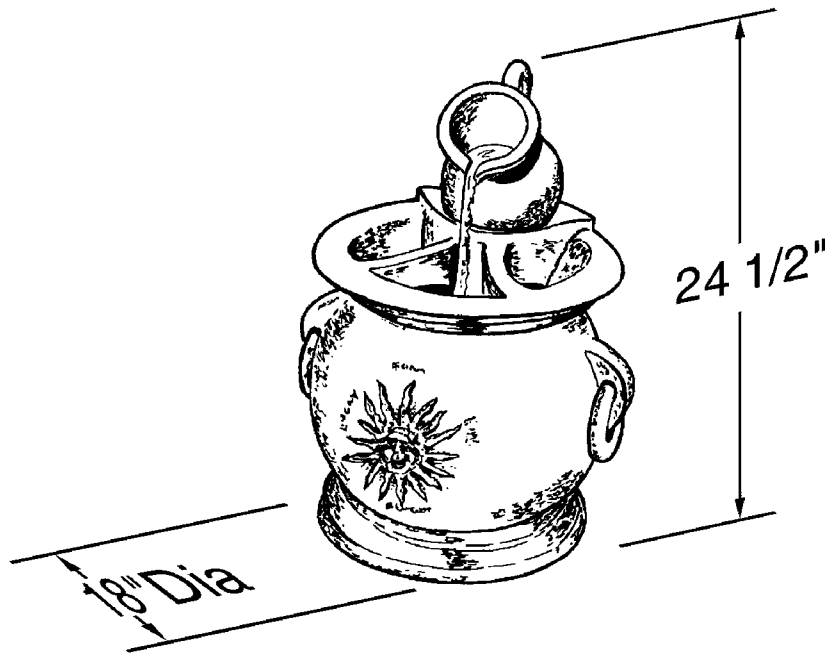

Classical Fountains™ water features are easy to assemble and are ready to use in minutes. Just position your fountain, arrange your flowers and foliage to your liking, add water and plug the pump power cord into a nearby GFCI electrical outlet. Our unique, patented integral planter design helps prevent planter soil from clogging the pump. Because our fountains are molded of watertight, durable polyethylene, they won't degrade like concrete, wood or metal fountains. What's more, Classical Fountains™ water pumps require very little maintenance, and are built to the highest quality standards to provide you with years of enjoyment.

Classical Fountains™ by Little Giant® are designed for low-maintenance satisfaction and backed by a one-year warranty from Little Giant®, one of the nation's leading manufacturers and suppliers of water pumps and accessories.
