CEC COMPLIANT **PRODUCT REFERENCE**

GROHE.COM/US

CODES & STANDARDS

Throughout the U.S., many regions are experiencing changing water conditions. In California, in response to the state's historic drought, the California Energy Commission (CEC) recently approved new, stricter requirements for showerheads and then voted to move up the start date for their recently adopted standard for lavatory faucets.

As one of the recognized leaders in water-savings technologies, GROHE is proud to offer a full-line of showerheads and faucets that significantly reduce your water consumption while providing an enjoyable and revitalizing experience.

The product list is updated at date of printing, March 1, 2017. While it is not a complete reference to every municipal or state regulation, we provide accurate flow rate and model information with compliance to major regulations.

With frequent code and standard changes alongside new product introductions, information on our compliant GROHE product models is dynamic. Please check our website for updated information and contact your GROHE representative with questions.

	What Is It?	Effective Date	Bath Faucets Max. Flow Rate(s)	Showerheads Max. Flow Rate(s)	Kitchen Faucets Max. Flow Rate(s)
California Energy Commission (CEC) 	The California Energy Commission or CEC enacted California Title 20 Water Efficiency Standards in 2015 to address severely depleted water supplies throughout the state. The CEC's water efficiency standards are comparable or lower than the CALGreen code and WaterSense program standard.	2016	0.5gpm (Public) 1.2gpm (Residential)	2.0 / 1.8gpm ¹	2.2 / 1.8gpm ²

¹ 2.0gpm current; 1.8gpm July 2018, ² 1.8gpm maximum with temporary increase to 2.2gpm
