Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with your packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the needed parts are included in the package by checking off the components on the "Detailed Diagram of Shower Door Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. Please note that **DreamLine® will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed.** Please contact DreamLine® if you have any questions and please provide an order number, job name or other proof of purchase to help identify the original order.
2. Install all of the required plumbing and drainage before installing the shower base. **Use a competent and licensed (if required by local code) plumber for all plumbing installation.**
3. **Shower bases must be installed by a licensed plumber. Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location and DreamLine® is not responsible for code compliance standards for your project.**
4. Please insure that prior to the installation the installation surface is leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. While some adjustment in leveling of the tray is possible, irregular installation surface level or improper angle of side walls will result in serious problems for your installation. Please note that some adjustments may be necessary during the installation process.
5. **Center drain configurations are centered on the width only. See technical drawing tables for drain locations.**
6. **Drain not included with this product.** The drain opening is 3-3/8" diameter and accepts a standard 2" compression fitted drain.

IMPORTANT NOTE:

Dimensions provided are for reference only. Measure the actual shower tray before installation. This includes overall dimensions and drain location. Allowed tolerance for center of the drain is +/-1/2".

Shower Base Cross Section Diagram

Shower Base Installation - Preparation

1. Ensure that the floor and the studs are at right angles.
Provide a 5"×5" opening in the sub-floor for the drain.
The 2" PVC waste pipe should extend above the surface of the sub-floor according to the drain installation instructions and the height of the Shower base.
Refer to the product drawings and tables in this installation manual for the drain location.

See Fig. 1 and Fig. 2 for details.

Fig. 1

Fig. 2

2. Install the shower drain (**NOT INCLUDED**) according to the drain installation manual (supplied with the drain).

See Fig. 3 for example

Fig. 3

3. Place the tray into the designated position so that the Drain cutout drops around the Drain Pipe and butt the Shower Base up against the studs.

See Fig. 4 for details.

Lower the base over the drain pipe and set it into place against the studs.

Fig. 4

4. Level the tray and place marks on the studs above the upper edge of the tile flange.

See Fig. 5 for details.

Fig. 5

5. Mix the bedding material (Mortar, cement-sand mix, etc.) **Concrete or plaster is not recommended.** Apply enough bedding material to support the entire bottom of the shower base. This will add additional stability and prevent the base from shifting position.

See Fig. 6 for details.

Fig. 6

6. After the bedding material has been poured and *before* it sets, place the shower base into the position with the drain assembly sliding over the PVC waste pipe. It will be necessary to push the shower base until the top of the tile flange aligns with the marks drawn on the studs and the front edge is contacting the rough floor along the entire length of the shower base. Ensure that the base is level in all directions. You may need to use shims to hold the tray in the level until the bedding settles and supports the tray. Remove all excess mortar.

See Fig. 7 for details.

Fig. 7

7. Allow the bedding material to completely harden before applying weight to the bottom of the shower base.

Install the cement board (or the wallboard) above the tile flanges and secure it to the studs. Put the tiles (or other finishing wall material) over the cement board leaving 1/8" gap between the bottom of the tile or wall kit and the shower base. Use caulk to fill the gap.

See Fig. 8 and Fig. 9 for details.

Fig. 8

Fig. 9

Product Maintenance

BASES and BACKWALLS: To ensure long lasting life for your acrylic base and/or back walls: wipe them off after each use with a soft cloth. To clean the acrylic base or back walls use non-abrasive sprays or cream based cleaners. Avoid the use of aerosol spray cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

GLASS: To ensure long lasting life for your glass shower products: wipe them off after each use with a soft cloth. Rinse and wipe off the glass using either a soft cloth or a squeegee to prevent soap buildup and water spots (Hard water can etch the surface of the glass over time if left to dry). To prevent scratching the surface: never use abrasive cleaners or cleaning products that contain scouring agents. Never use bristle brushes or abrasive sponges that may scratch the surface.

HARDWARE: To ensure a long lasting finish: wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent damage to the finish (peeling or corrosion). After cleaning the polished finishes, rinse thoroughly and wipe dry with soft cloth.

Clean stainless steel surfaces at least once a week. When applying stainless steel cleaner or polish to stainless steel hardware, work with (not across) the grain. Never use an abrasive sponge or cloth, steel wool or wired brush as these may permanently scratch the surfaces.

NOTE: To maximize the life of your door, it is important to regularly inspect the glass and other hardware for misalignment, proper attachment, and/or damage. Contact DreamLine with any questions or concerns.

ACRYLIC SHOWER WALL INSTALLATION INSTRUCTIONS

IMPORTANT

DreamLine™ reserves the right to alter, modify or redesign products at any time without prior notice. For the latest up-to-date technical drawings, manuals or any other details please refer to your model's web page on BathAuthority.com

Please read these instructions carefully before installing. If you have any questions regarding installation, please contact our technical support specialists Monday through Friday 8:00 AM – 7:00 PM EST at Phone: **1-866-731-2244**, Fax: **1-866-857-3638** or e-mail our technical support group at Support@BathAuthority.com

For more information on [DreamLine™ Shower Back Wall](http://www.BathAuthority.com) please visit www.BathAuthority.com

Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with your packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the needed parts are included in the package by checking off the components on the "Detailed Diagram of Acrylic Shower Wall Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. Please note that **DreamLine™ will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed**. Feel free to contact DreamLine™ if you have any questions, and please provide an order number, job name or other proof of purchase to help us identify your original order.
1. **Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location, and DreamLine is not responsible for code compliance standards for your project.**
2. This acrylic wall system is specially designed to be installed over any solid surface. If you are installing the acrylic walls over the existing tiles, remove all loose tiles before the installation. If you are installing over the existing painted walls, take all loose paint off. Please, note that some cutting and drilling might be necessary during the installation process.
3. Make sure to turn off the water supply, remove faucet, handles or any fixture trims protruding from the wall. Clean the surface removing soap film and dirt from all wall surfaces using regular household detergent, and then wipe it dry.

Tools Required

Detailed Diagram of Acrylic Shower Wall Components

Packing List

01	Side panel	2pcs	05	Glass shelf	2pcs
02	Corner cover	1pc	06	Wall anchor	11pcs
03	Decorative edge molding	2pcs	07	Countersunk screw ST4.2×40	11pcs
04	Shelf bracket	6pcs	08	Decorative cover	5pcs

NOTE: Unpack your unit carefully and inspect it. Lay it out and identify all parts using the detailed diagram and packing list in your manual as a reference. Before discarding the carton, check for small hardware bags that may have fallen to the bottom of the box. If any parts are damaged or missing, please contact DreamLine™ for replacement. The shipping boxes may contain extra parts not used in your model configuration.

NOTE: Retain these installation instructions for future reference.

Preparation for Installation of Side Panel

ATTENTION:

If you are installing a shower enclosure with a wall profile, you can hide the edge of the **Side panel (01)** behind the wall profile.

See Fig. 1 for details.

Fig. 1

1. Place a mark on the walls with a distance of **1" (one inch)** from the corner and draw a plumb vertical line from top to bottom.

See Fig. 2 for details.

Fig. 2

2. Measure the walls of the shower from the **1" (one inch)** line in the corner (from Step. 1) to the points where you want **Side panels (01)** to end.
The distances are "**D1**" and "**D2**".

NOTE:

"D2" Shows wall with the fixture.

See Fig. 3 for details.

Fig. 3

3. Determine the position of both **Side panels (01)**.

NOTE:

- a) The narrow edge of the **Side panels** fits behind the corner cover and cannot be trimmed.
- b) The wide edge of the **Side panel** can be trimmed to the size of your measurements from step 2.

Measure from the narrow edge of the **Side panel** and place a mark at a distance of "**D1**" and "**D2**" (that you measured in Step 2). Draw a straight line from top to bottom along the wide edge of the **Side panel**.

See Fig. 4 for details.

Fig. 4

4. Place the **Side panel (01)** on a flat piece of plywood or particle board. Use a sharp industrial knife and a T-square to score along the marked wide ends of the **Side panel** and continue scoring until you have fully cut through the panel.

See Fig. 5 and Fig. 6 for details.

Fig. 5

Fig. 6

5. Take exact measurements of the fixture on the wall:

- from the **1" (one inch)** line in the corner of the shower to the fixture:
(A, B, C)
- from the bottom of the wall of the shower to the fixture:
(E, F).

See Fig. 7 for details.

Fig. 7

6. Determine which **Side panel (01)** will be installed on the side wall with the fixture.
Mark the fixture location on the **Side panel** according to the measurements taken in Step. 5.

See Fig. 8 for details.

Fig. 8

7. Drill the holes for the fixtures in the **Side panel (01)** using the proper diameter saw bit or a handheld jig saw.

See Fig. 9 for details.

Fig. 9

Acrylic Side Panel **Installation Instruction**

8. Attach the **Corner cover (02)** to the corner of the shower and mark the drilling holes through the predrilled holes in the **Corner cover**.

Move aside the **Corner cover**,
Drill the holes using **Ø5/16"** drill bit and insert the **Wall Anchors (06)**.

See Fig. 10 and Fig. 11 for details.

Fig. 10

Fig. 11

9. Mount the **Corner cover (02)** to the corner of the shower using the **Countersunk screws ST4.2×40 (07)**. Do not fully tighten the screws at this time; leave them loose for further installation.

See Fig. 12 and Fig. 13 for details

Fig. 12

Fig. 13

10. Apply the sealant to the entire surface of the reverse side of the **Side panel (01)**. Also, apply the sealant around the drilled holes.

See Fig. 14 for details.

Fig. 14

11. Slide the narrow edge of the **Side panel (01)** behind the **Corner cover (02)**. Align trimmed edge of the **Side panel** (from Step. 4) with the marked line on the wall (in Step. 2) and push the **Side panel** against the wall.

NOTE:

Make sure the drilled holes on the **Side panel** are also aligned with the fixtures on the wall.

See Fig. 15 for details.

Fig. 15

12. Apply sealant to the entire surface of the reverse side of the other **Side panel (01)**.

See Fig. 14 for details.

13. Slide the narrow edge of the **Side panel (01)** behind the **Corner cover (02)**. Align trimmed edge of the **Side panel** (from Step. 4) with the marked line on the wall (in Step. 2) and push the **Side panel** against the wall.

Align the top of both **Side panels** and the **Back panel** before the sealant sets. Apply equal pressure to the whole surface of the Acrylic panels from top to bottom.

See Fig. 16 for details.

Fig. 16

14. Once **Side panels (01)** aligned, fasten tight the **Corner cover (02)** to secure the **Side panels**.
Cover the screw holes with the **Decorative cover (08)**.

See Fig. 17 for details.

Fig. 17

ATTENTION:

Prior to the next step, please be sure the part of the wall for installation of the Decorative edge molding (03) is clean, dry and free from soap, oil and any construction debris.

15. Gently remove the plastic tape from the adhesive side of the **Decorative edge molding (03)** and firmly press it to the edge of the **Side panel (02)** from top to bottom.

See Fig. 18 for details.

Fig. 18

16. Apply caulk along the top edge of the **Side panels (01)** and along the connection of the bottom edges of the **Side panels** with the Shower base.

See Fig. 19 for details.

ATTENTION:

Installation of "QWALL-4" Acrylic shower wall is complete.

If you want to install **Glass shelves (05)** to your Shower, follow to the next step.

Fig. 19

Glass Shelves Installation Instruction

17. Determine the desired height for the **Glass shelves (05)** and mark the locations on the wall.

NOTE:

The **Glass shelves** can be installed either two in one corner, or one in each.

See Fig. 20 for details.

Fig. 20

18. Mark the location for the **Shelf brackets (04)** according to the measurements in Fig. 20 and Fig. 21.1.

Drill the holes using **Ø5/16"** drill bit and insert the **Wall anchors (06)**.

See Fig. 21 for details.

Fig. 21

19. Mount the **Shelf brackets (04)** to the wall using the **Countersunk screws ST4.2×40 (07)**.

NOTE: the padded set screw of the Glass bracket should be facing down.

Slide the upper **Glass shelf (05)** into the upper **Shelf brackets** and tighten the set screws at the bottom of the brackets. Then slide the bottom **Glass shelf** in place. Tighten the set screws on the bottom **Shelf brackets** as well.

See Fig. 22 and Fig. 23 for details.

Fig. 22

Fig. 23

Product maintenance

To ensure long lasting life for your acrylic back walls, wipe them off after each use with a soft cloth. To clean the acrylic back walls use non-abrasive sprays or cream based cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

Acrylic cleaning procedure:

Acrylic should be cleaned with warm water and a clean, non-abrasive cloth. If desired, a mild, non-abrasive detergent may also be used. Use only light pressure when cleaning. Avoid rubbing dirt or grit into the surface. Turn the cloth often and replace with a clean cloth frequently. Dry by blotting gently with a clean, dry cloth.

DO NOT USE:

Window cleaning sprays, alcohol, kitchen abrasive compounds, or solvents (such as acetone, gasoline, or thinners). Do not use ammonia based cleaning solutions on the acrylic as it will damage the surface.

How do you get scratches out of Acrylic?

For light scratches, use a buffing compound such as a car wax. Use a buffer or lightly polish the surface by hand until scratches disappear.

Preparation

1. Prior to installation, examine all boxes and packages for shipping damage and compare the piece count with your packing slip. After opening all boxes and packages read this introduction carefully. Check that all of the needed parts are included in the package by checking off the components on the "Detailed Diagram of Shower Door Components". If the unit has been damaged, has a finishing defect, or has missing parts, please contact our customer support department within **3 business days** of the delivery date. Please note that **DreamLine® will not replace any damaged products or missing parts free of charge after 3 business days or if the product has been installed.** Feel free to contact DreamLine® if you have any questions, and please provide an order number, job name or other proof of purchase to help us identify your original order.
2. **Please note that you should consult your local building codes with questions about installation compliance standards. Building and plumbing codes may vary by location, and DreamLine® is not responsible for code compliance standards for your project and will not accept any returns.**
3. If this unit is going to be installed in a new construction, please install all of the required plumbing and drainage before installing the shower. **Use a competent and licensed (if required by local code) plumber for all plumbing installation.**
4. Please make sure that prior to beginning the installation, the surfaces are leveled and solid and will be able to support the total weight of the unit. Also make sure the walls are at right angles. Irregular installation surface level, radius corners or improper angle of side walls will result in serious problems for your installation. Please, note that some adjustments and drilling may be necessary during the installation process.
5. Please protect all primary surfaces of the product during installation. Never set your glass down directly onto a tile floor. Leave corner protectors in place until necessary to remove them. Always use a piece of wood or cardboard to protect the bottom edge and corners of the glass prior to and during installation.
6. This unit must be installed upon a finished threshold and against finished walls.
7. **This model has 1" of adjustment for out-of-plumb wall conditions within the wall profiles.**

NOTE: DO NOT install the handles onto the door glass until instructed to do so. **DO NOT** lift the glass using the handles. This could result in damage to the glass and /or serious personal injury.

NOTE: For models with Frosted glass, install the textured surface towards the inside of the shower

Packing List

01	Wall profile	2pcs	10	Truss head screw ST4.2×40	8pcs
02	Glass profile	2pcs	11	Round head screw ST4.2x25	8pcs
03	Guide rail	2pcs	12	Round head screw ST4.2x10	4pcs
04	Glass door	2pcs	13	Flat head screw ST4.2x16	4pcs
05	Stationary glass	2pcs	14	Decorative cover with washer	4pcs
06	Handle	2pairs	15	Wall anchor	8pcs
07	Magnetic strip	1pair	16	Glass holder	4pcs
08	Anti-water strip (2 long, 2 short)	4pcs	17	Wheel assembly (top & bottom)	4pairs
09	Single side strip	2pcs			

NOTE: Unpack your unit carefully and inspect it. Lay it out and identify all parts using the detailed diagram and packing list in this manual as a reference. Before discarding the carton, check for small hardware bags that may have fallen to the bottom of the box. If any parts are damaged or missing, please contact DreamLine® for replacement. The shipping boxes may contain extra parts not used in your model configuration. **NOTE:** Retain these installation instructions for future reference.

Shower Enclosure Installation

1. Fasten the bottom **Guide rail (03)** to the **Glass profiles (02)** with the **Round head screws ST4.2x25 (11)**.

See Fig. 1 for details.

TIP: Apply a small amount of wax or liquid soap to the screws to make installation easier and to prevent stripping the screws while screwing the Glass profiles (02) to the Guide rails (03).

Fig. 1

2. Slide each **Stationary glass (05)** fully into the groove of the **Glass profiles (02)**, and then secure it by attaching the **Glass holders (16)** to the bottom **Guide rail (03)** using the **Flat Head ST4.2 x 16 screws (13)**.

See Fig. 2 for details.

TIP: Apply a thin bead of silicone to the bottom rail when setting the glass in place.

Fig. 2

3. Insert the **Single side strips (09)** in-between the **Stationary glass (05)** and the **Glass profiles (02)** using a wooden shim or plastic blade. The strips should be inserted from the side that will face inside the shower.

ATTENTION:

Do not use a screwdriver or other metal objects to push in the strips to prevent scratching or damaging the glass and aluminum.

See Fig. 3 for details.

4. Repeat Step #1 and Step #2 to fasten the upper **Guide rail (03)** to the **Glass profiles** and secure the **Stationary glass** with the **Glass holders (16)**.

See Fig. 1 and Fig. 2 for details.

Fig. 3

5. Slide the **Wall profiles (01)** all the way over the **Glass profiles (02)** on both sides. Make sure the flanges of the **Wall profiles (01)** face inside the shower.

See Fig. 4 for details.

Fig. 4

6. Move the finished frame to the designated position on the shower base or threshold and push it tight to the walls. If the walls are out-of-plumb, make adjustments by slightly pulling the **Wall profiles (01)** out of the **Glass Profiles (02)**.

Use a level to adjust the frame into a plumb, vertical position on both walls.

See Fig. 5 for details.

NOTE: The installed unit may not sit perfectly centered on the threshold, depending on the thickness of the finished wall treatment used. You may adjust the position outward slightly by extending the wall profiles.

Fig. 5

7. Hold this assembly in position and mark the drill holes on the wall through the holes on the flange of the **Wall Profiles (01)**.

Carefully set the assembled unit aside; drill the holes using a $\text{Ø } 5/16''$ drill bit and insert the **Wall anchors (15)**.

Apply silicone caulk along the **Wall profiles (01)** and around the holes on the wall. Also apply silicone under the bottom **Guide rail (03)**. Place the entire shower assembly back into the designated position on the threshold and secure it to the walls using the **Truss head screws ST4.2×40 (10)**.

See Fig. 6 for details.

Fig. 6

8. Fasten the top and the bottom **Wheel assemblies (17)** to the **Glass doors (04)**. The top wheels can adjust the door level with the adjustable bolt and lock nut. The bottom wheel has a press button to allow installation of the wheel into **Guide rail (03)**.

Note:

The lock nut of the upper wheel (Fig 7.1) and the press button of the bottom wheel should be pointing up.

See Fig. 7 & 8 for details.

NOTE: DO NOT install the handles onto the door glass until instructed to do so. **DO NOT** lift the glass using the handles. This could result in damage to the glass and/or serious personal injury.

Fig. 7

9. Slide the top door wheels into the top **Guide rail (03)**. Push the bottom wheels into the bottom **Guide rail (03)** by pressing the button on the **Wheel assembly (17)**.

NOTE:

If necessary, use a hand screwdriver (do not use a power screwdriver) to adjust the upper wheels to make minor adjustments so that the doors operate smoothly and seal tight with the magnets.

See Fig. 8 for details.

Fig. 8

10. Install the **Handles (06)** onto the **Glass doors (04)**.

Press the **Anti-water strips (08)** onto the vertical edges of the **Stationary glass (05)** and both vertical edges of the **Glass doors (04)** (the shorter strips attach to the panel glass and the longer strips onto the doors).

Press the **Magnetic strips (07)** onto the vertical edges of both **Glass doors (04)** for a tight seal.

See Fig. 9 for details.

Fig. 9

11. Make final adjustments of the assembled unit within the **Wall profiles (01)**, making the unit tight to the walls and tight to the threshold.

From inside of the shower area, drill 2 holes through the **Wall Profiles (01)** into the **Glass profiles (02)** using an $\varnothing 1/8''$ drill (one hole at the top and one hole at the bottom)

ATTENTION:

Do not drill the profiles throughout, only through the first layer of the wall profile and the glass profile.

Secure the **Wall profiles (01)** to the **Glass profiles (02)** using the **Round head screws ST4.2×10 (12)** and washers (Fig 10.2). Cover the exposed screw heads with the **Decorative covers (14)**.

See Fig. 10 for details.

Fig. 10

12. Apply a good quality mildew-resistant silicone sealant along the profiles and guide rails; on the seams between the bottom guide rail and the profiles as well as along the shower base or threshold from the inside of the shower area. You may also apply silicone along the outside if you choose.

See Fig. 11 for details.

Allow 24 hours for the silicone to fully cure before using the shower.

Follow the safety guidelines from the Sealant manufacturer concerning application, proper ventilation and cure time.

Fig. 11

Product Maintenance

BASES and BACKWALLS: To ensure a long life for your acrylic back walls: wipe them off after each use with a soft cloth. To clean the acrylic back walls use non-abrasive sprays or cream based cleaners. Never use abrasive cleansers, metal brushes or scrapers that could scratch or dull the surface.

GLASS: To ensure long lasting life for your glass shower products: wipe them off after each use with a soft cloth. Rinse and wipe off the glass using either a soft cloth or a squeegee to prevent soap buildup and water spots. To prevent scratching the surface: never use abrasive cleaners and cleaning products that contain scouring agents. Never use bristle brushes or abrasive sponges.

HARDWARE: To ensure a long lasting finish: wipe off the metal parts after each use with a soft cloth. Do not use abrasive cleaners or cleaning products containing ammonia, bleach or acid. If accidentally used, rinse the surface as soon as possible to prevent finish peeling or corrosion. After cleaning the shiny finishes, rinse thoroughly and wipe dry with soft cloth. Never use abrasive sponges or cloth, steel wool or wired brushes as these may permanently scratch the surface.
