

Safety Glasses - Anti-Scratch Lenses

Our Anti-Scratch Safety Glasses are designed for all day comfort with anti-scratch lenses. This protective eyewear has an anti-scratch hard coat to protect the lenses from the demands of the jobsite. The safety glasses feature comfortable temple arms designed for extended wear. These protective glasses have an integrated flexible nose bridge, providing you with extended comfort. These MILWAUKEE® Anti-Scratch Safety Glasses are available with yellow, gray, clear, and magnifying lenses. The yellow lenses make environments appear brighter, making them ideal for working in low light. Gray lenses are best for both indoor and outdoor work, and magnifying lenses eliminate the need to wear additional eyewear under your safety glasses. Our Anti-Scratch Safety Glasses allow you to see what's important without sacrificing protection.
